

# POWERBUILT

## *Door Install Lift Assists*

### PROBLEM

- \* *Need (4) articulating arms to assist the installation process of the completely built doors to the vehicle of (4) different models*
- \* *Current arms could only accommodate (3) models*

- \* *Tool mounted to a double runway. (no bridges)*
- \* *Assists can handle at a minimum a 90 pound door and extend out 4' from carriage center*
- \* *Tie bar used to keep angle of end tool constant throughout rotation of tool*

### SOLUTION

- \* *X-Ybridge mounted lift assist to install doors to 4 different models at any given time with no end tool changeover or adjustment.*
